PETITION FOR RULE MAKING

In this petition, West Wind Broadcasting is hereby requesting to allot channel 222A (92.3 Mhz) to Victor, Idaho as its first local FM allotment.

INTRODUCTION

1. This statement is a petition for rule making to allot FM channel 222A (92.3 Mhz) to Victor, Idaho and add it to the Commission's FM table of allotments, 73.202. The following will show the need for an FM channel and the effects the allotment of Channel 222A to Victor will have.

DISCUSSION

2. Victor is located in northeast Idaho. It is also located within Teton County, a county of some 3,439 persons. Victor has a population of 292 persons in accordance with the U.S. 1990 census.

3. The allotment of channel 222A to Victor will provide the first local broadcast facility to the community and/or the surrounding area. The closest FM allotment to Victor is located at Jackson, Wyoming. Jackson is located 32 kilometers from Victor.

It is obvious that from the above spacing that Victor is presently without local FM service.

4. Victor would greatly benefit from an FM allotment due to the fact there is no AM or FM broadcast facilities within 32 Kilometers of Victor. Because of this, it would have an outlet for local self expression. Health and safety for the community would be increased due to having a local communications outlet for warning the Victor area of emergency conditions caused by severe weather or other health hazards.

5. Channel 222A can be allotted to Victor and meet all rules and requirements of the Commission. The instant proposal will not cause a change in the channel number or a deletion of any channel now appearing in the Commission's table of allotments 73.202.

	<u>Present</u>	<u>Proposed</u>
Victor, Idaho	-----	222A

6. In accordance with 73.207 of the Commission's rules, "Minimum Distance Separations between Stations", all allotments on Channel 222A and the pertinent adjacent channels to 222A have been studied with the results listed in Figure 1 of this petition. The geographic coordinates used for the spacing

Study (N 43 - 36' - 30", W. 111 - 07' - 0") are that of a site located within the community of Victor. No site restriction will be required to allot channel 222A to Victor. Many suitable transmitter sites are available to provide city grade coverage (3.16 mv/m or 70 dbu) to the entire community of Victor. These sites would also provide full minimum spacing requirements to other allotments.

CONCLUSION

7. It has been shown that Victor would benefit from the allotment of channel 222A. It has also been shown that channel 222A can be allotted to Victor and meet all rules regarding spacing from other stations. Considering these two facts, West Wind Broadcasting hereby requests that the Federal Communications Commission institute a Rule Making proceeding to amend the Table of Allotments to include channel 222A for Victor, Idaho , 73.202.

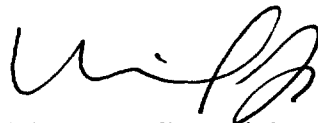

8. Should channel 222A be allotted to Victor, Idaho, I certify that I will file an application for a Construction Permit to operate an FM station for Victor, Idaho.

CERTIFICATION

9. I certify that I have prepared or directly supervised the preparation of this entire Petition for Rule Making, and that the facts contained within are true to the best of my knowledge, information and belief, accurate and true.

Dated: December 3, 1996

Respectfully submitted,

Victor A. Michael Jr.
President
West Wind Broadcasting
